ABOUT US

Abhinav Healthcare Products Pvt Ltd, a pioneer in natural healthcare solutions since 2003. Our GMP certified facility on the outskirts of Mumbai is dedicated to producing high-quality health care products. Founded by experienced technocrats with a background in industrial manufacturing, we specialize in crafting cosmetics, ayurvedic health products, and nutraceuticals. Committed to global manufacturing practices, we ensure our products meet international standards, including WHO guidelines for herbal products.

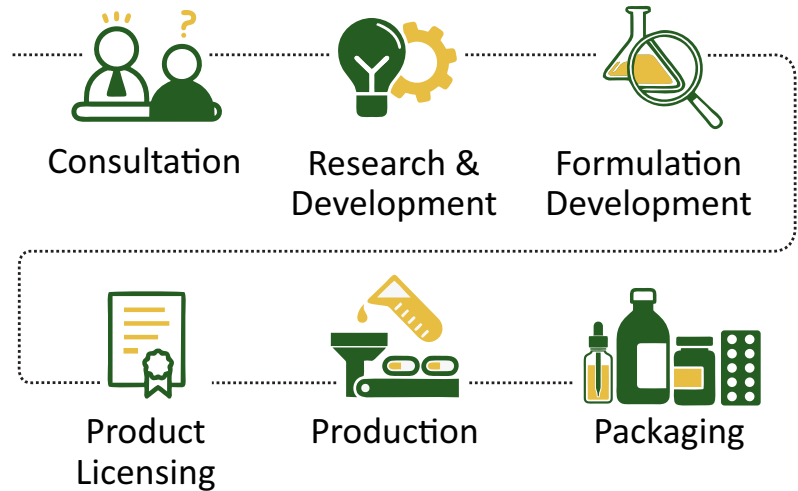

ABHINAV'S 20-YEAR ODYSSEY

Our excellence is underscored by FDA registration, and guaranteeing compliance with rigorous standards. With two decades of experience. Our team combines traditional wisdom with modern science, creating safe and effective health care solutions. Join us on this journey, experiencing the difference two decades of expertise can make.

Contract & Private Labeling (3rd Party) Manufacturing

ABHINAV HEALTHCARE boasts impressive manufacturing capabilities, allowing us to meet the growing demands of our customers. With our state-of-the-art, WHO-GMP standard manufacturing facilities and efficient processes, we have capacity to produce a significant volume of healthcare products.

Accreditation

Our Expertise

Ayurvedic Proprietary medicines:

At ABHINAV HEALTHCARE, we celebrate the seamless integration of Ayurvedic wisdom and advanced technology in our manufacturing processes. Our facility is a balanced blend of tradition and innovation, where ancient knowledge converges with modern excellence. Our commitment to purity is unwavering. We source raw materials from the far corners of the world and process them under pristine conditions, meticulously guided by our R&D team. Utilizing traditional apparatus prescribed in Ayurvedic texts, we ensure the optimal extraction of nutrients for maximum efficacy. This harmonious marriage of tradition and innovation forms the backbone of our commitment to delivering premium quality natural healthcare products.

Nutraceuticals :

Nutraceuticals, a fusion of "nutrition" and "pharmaceuticals," represent a dynamic category of health-enhancing products. These bioactive compounds, found in various forms such as dietary supplements, functional foods, and beverages, bridge the gap between nutrition and medicine. Designed to provide essential nutrients and promote overall well-being, nutraceuticals have gained widespread popularity for their potential to support various health goals.

3

Cosmetics:

In the recent past, there has been a notable transformation in the global beauty industry, marked by a substantial inclination towards natural and herbal cosmetics. With consumers increasingly mindful of the ingredients they use on their skin and hair, there has been a growing demand for skincare products.

Why Abhinav Healthcare Products Pvt. Ltd. ?

Custom Formulations

At ABHINAV HEALTHCARE, our team of specialists collaborates with you to craft tailored formulations that align with your unique requirements. Employing exclusively top-tier ingredients, we adhere to rigorous manufacturing standards, guaranteeing the safety, efficacy, and premium quality of our products.

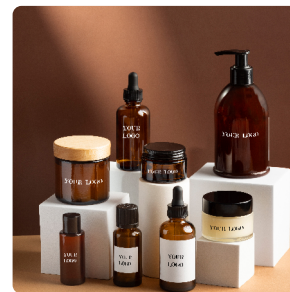

Third Party Manufacturing

ABHINAV HEALTHCARE provides third-party manufacturing services for a wide range of therapeutic products. Our advanced facilities and skilled team cater to diverse therapeutic categories, offering a reliable outsourcing solution. Leveraging spare capacity, we ensure timely and quality production for pharmaceuticals, herbal formulations, and nutraceuticals. Additionally, we specialize in private label and neutral code exports, maintaining partner confidentiality and branding while meeting market-specific regulations and labeling standards.

Custom Packaging & Labeling

Explore our diverse array of custom packaging and labeling options tailored to assist you in establishing a distinctive brand identity. From bottles and jars to tubes and beyond, we provide a range of packaging solutions that can be personalized to showcase your logo and other branding elements.

Bio-Enhanced Products

By incorporating bio-enhancers in each Abhinav product, we ensure that the active ingredients are delivered in a form that is easily absorbed by the body. This innovative approach enhances the absorption rate, resulting in faster action and reducing the required dosage. Our dedication to bio-enhancement means that you can experience the maximum benefits from our health care products.

Our Patent Technology For Extracts

FMB extracts offer higher therapeutic benefits as compared to standardised extracts. It can be used in all dosage forms, like tablets, capsules, syrups, creams, etc., in the ayurveda, herbal, and nutraceutical. The requirement of a lower therapeutic dose of FMB extracts provides a better economy of product.

1st TIME IN THE HISTORY

Extracts Standardized For Phyto-chemical & Phyto-Minerals/ Essential Trace Elements
